PROFESSIONAL SUMMARY

Game Developer with 3+ years of professional experience in designing and developing high-quality mobile and multiplayer games using Unity (2D/3D), C#, Lua, and C++. Experienced in building scalable gameplay systems, multiplayer features, backend integrations, and live game services using Socket.IO, Beamable, REST APIs, and Unity Addressables. Strong expertise in gameplay architecture, debugging, and performance optimization. Proven track record of contributing to shipped commercial titles by delivering engaging player experiences and collaborating effectively with cross-functional teams.

TECHNICAL SKILLS

Programming Languages: C, C++, C# (Unity), Java, Python, Lua
Game Engines: Unity 2D/3D (Proficient), Unreal Engine (Beginner)
Tools & Technologies: Git, SVN, Unity Profiler, Docker, MongoDB, Beamable, Zenject
Concepts & Methodologies: Design Patterns, Physics, REST APIs, OOPs, SOLID Principles, Gameplay Architecture, Debugging, Problem Solving, Multiplayer Systems, AI Behavior, Mobile Optimization
Platforms: PC, Mobile (Android/iOS)

WORK EXPERIENCE

Unity Developer / Game Programmer | Gameshastra | Hyderabad, India April 2024 – Present

- Engineered slot game mechanics using Lua and C#, improving game responsiveness and overall logic flow.
- Architected core gameplay mechanics for a real-time multiplayer cricket game, implemented AI bots and Ghost Bot systems using recorded player data for asynchronous gameplay.
- Built and Integrated real-time PvP features and integrated Beamable backend services, enabling real-time player connectivity through Socket.IO & Photon.
- Implemented UI designs and gameplay enhancements to boost player engagement metrics.
- Contributed to Desi Beats (1M+ downloads), focusing on UI design improvements and user experience optimization.
- Designed APIs and debugged gameplay systems for Spin Roll Go, ensuring stable and responsive game logic.
- Implemented Unity Addressables to efficiently manage and load game assets, reducing memory usage and improving loading performance across multiple game modules

Intern Game Programmer | Gameshastra | Hyderabad, India Oct 2023 – April 2024

- Integrated scalable gameplay architecture including AI systems, mission logic, combat mechanics, and NPC behavior, improving gameplay performance and modularity.
- Designed and implemented core systems including vehicle control, progression mechanics, event triggers, and game state management.
- Contributed to slot game development by fine-tuning gameplay logic in Lua and implementing SFX to improve overall game feel.

PERSONAL PROJECTS

Bagh-Chal – Turn-Based Strategy Game

- **Link -** https://github.com/palashparate009/BagChal_Main.git
- Independently developed a complete turn-based strategy game featuring asymmetric gameplay mechanics from concept to playable build.
- Designed and implemented AI logic and a grid-based interaction system to manage player moves, win conditions, and game flow.
- **Technologies:** Unity 2D/3D, C#, AI State Machines, Grid Systems

EDUCATION

Bachelor of Science (Honours) – Computer Science & Game Development • Completed: 2024
BackstagePass Institute of Gaming and Technology, Hyderabad

12th Grade – HSC Boards • Completed: 2021
Hemant Jakate College of Engineering
